

HELP KEEP YOUR KIDS HEALTHY, VACCINATE AGAINST COVID-19

How to make an appointment:

Several providers are currently offering the vaccine in our region. Check phd5.idaho.gov/covid-vaccine for a list of providers with openings this week, take a picture of the QR code to the right, or call the hotline for assistance: 208-737-1138.

1: IT'S SAFE

These vaccines have gone through several clinical trials that included thousands of volunteers. None of these volunteers have had any serious side effects during the trials or for the two month monitoring period afterward.

2: IT'S EFFECTIVE

It's the most effective way to prevent getting COVID-19. Even if you get the disease, these vaccines will help prevent serious illness.

3: IT'S FREE

The vaccine is covered by federal funds. Providers may be able to charge an office visit fee but this is covered by insurance or state funds.

4: MINIMAL SIDE EFFECTS

Millions of Americans have received the vaccine and have had little to no side effects. Fever, and body aches are safe and normal reactions to a vaccine, even in children. Most commonly, children have shown fatigue and soreness on their arm after receiving the vaccine.

FIGURING OUT THE INS AND OUTS OF A NEW VACCINE IS DIFFICULT

For more information about the vaccine, the approval process, the clinical trials, COVID-19 in children, or how to set an appointment, visit phd5.idaho.gov/Covid-vaccine/ to see a pdf of helpful information for parents. Or take a picture of the QR code at the top (the square design that looks kind of like a bar code) and follow the link that shows up on your phone.
